

## **Overview**

The ideal candidate will have demonstrated success working in DoD and foreign military as well as U.S. and foreign Civil ecosystems as a business development and sales professional, with strong interpersonal skills, a retained network of decisionmaker relationships and a demonstrated working knowledge of fixed-wing and rotary aircraft propulsion systems application principles.

## **Basic Function:**

Perform disassembly and assembly for T56/501D Series I, II & III Engines and their respective QECK's, Modules, Components, Subassemblies, and accessories. Perform intermediate and depot level repairs using approved data on the T56/501D QECK. Also build up and mating of QECK to engine, leak check, prepare for test and final preservation.

## **Essential duties are as follows but are not limited to:**

- Proper use and knowledge of tools and equipment.
- Disassembly, sub-assembly, and final assembly of QECK's
- Disassembly, assembly, and testing of aircraft accessories.
- Understand configuration & fits requirements during build.
- Know and perform proper servicing procedures.
- Ensure all work is complete and IAW posted work scopes.

## **Requirements:**

- Prior experience with electrical systems and wiring, hydraulic, oil, fuel and air systems.
- Familiarization with and able to read & interpret engine manuals, drawings/prints, and bulletin compliance.
- Must be able to read, write, speak, understand, and communicate in English.
- Must possess basic set of tools.
- Airframe & Powerplant license strongly preferred.

## **Basic Schedule:**

7:00 am – 3:30 pm Monday – Friday, additional time as needed.

**Interested, qualified candidates can submit their resumes for consideration to [resumes@turbopowerllc.com](mailto:resumes@turbopowerllc.com) and reference position title in the subject line.**
